M2500 MULTI-TOOL with C4 Technology™

**A WHOLE
TOOL CHEST
THAT WORKS
OFF ONE
POWERHEAD!**

SIX ATTACHMENTS FOR SUPERIOR VERSATILITY.

**Stronger.
Smoother.
Quieter.**

Shindaiwa's C4 Technology™ delivers the best of both 2-stroke and 4-stroke engines.

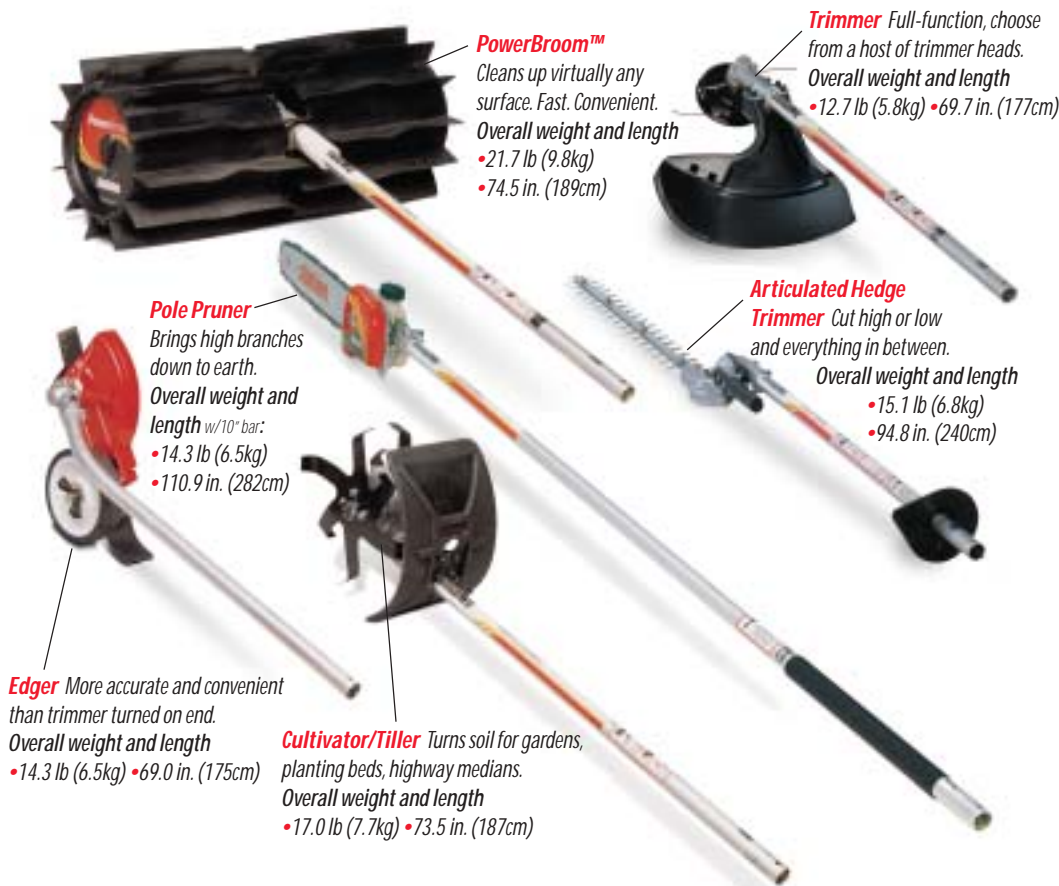

- Incredible torque under load.
- Quick throttle response.
- No oil sump. No dipstick.
- Uses 50:1 mixed fuel.
- True all-position operation.
- Excellent fuel economy.
- Emissions reduced by 75%.
- Meets 2005 EPA standards.

**Easy-to-change attachments
mean you work faster and
you're more productive.**

First to Start. Last to Quit.

M2500 Multi-tool with C4 Technology™

Attachments deliver high performance in virtually every landscaping requirement.

PowerBroom™
Cleans up virtually any surface. Fast. Convenient.
Overall weight and length
• 21.7 lb (9.8kg)
• 74.5 in. (189cm)

Trimmer Full-function, choose from a host of trimmer heads.
Overall weight and length
• 12.7 lb (5.8kg) • 69.7 in. (177cm)

Pole Pruner
Brings high branches down to earth.
Overall weight and length w/10" bar:
• 14.3 lb (6.5kg)
• 110.9 in. (282cm)

Articulated Hedge Trimmer
Cut high or low and everything in between.
Overall weight and length
• 15.1 lb (6.8kg)
• 94.8 in. (240cm)

Edger More accurate and convenient than trimmer turned on end.
Overall weight and length
• 14.3 lb (6.5kg) • 69.0 in. (175cm)

Cultivator/Tiller Turns soil for gardens, planting beds, highway medians.
Overall weight and length
• 17.0 lb (7.7kg) • 73.5 in. (187cm)

M2500 Specifications

Dry Weight (w/o attachments)
..... **10.2 lb (4.6kg)**
Engine Displacement .. **1.5 in³ (24.5cc)**
Engine Output
..... **1.1 hp (0.8kW) @8000 rpm**
Fuel Capacity **20.3 fl.oz. (600ml)**
Fuel **2-cycle mixed fuel**

Powerhead Features

All-position Walbro carburetor delivers excellent throttle response and fuel metering throughout the rpm range.

Heavy-duty air filter provides improved sealing for better filtration. Non-reversible filter cannot be installed backward.

Engine features chrome-plated cylinder with 2-ring piston, plus ball-and-caged needle bearings, hallmarks of superior quality.

High performance, low emissions.

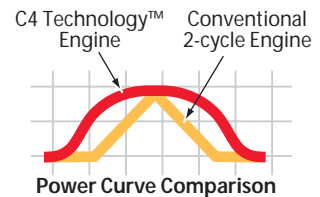

By combining the high power-to-weight ratio and compactness of a 2-cycle engine with the precise metering of a 4-cycle, we developed an engine that delivers the best of both worlds.

Easy-to-fuel; same as a 2-stroke.

The M2500 is fueled by a conventional 50:1 gasoline/oil mix—just like a 2-cycle—to provide continuous flowing lubrication throughout operation in any orientation, including upside down! There's no separate oil sump; no dipstick to check.

Outstanding power.

The secret to the remarkable performance is Shindaiwa's patented PowerBoost Chamber that provides a "supercharging" effect – it actually helps the engine develop more horsepower than a traditional 4-cycle engine of comparable size.

The PowerBoost Chamber also explains why the M2500 delivers high torque over a broader rpm range than a 2-cycle.

The M2500 is quality engineered for easy operation, long life and operator comfort.

COMFORT.
The comfortable loop handle features a soft, supple surface that provides an improved grip and reduces operator fatigue due to vibration.

SAFETY.
The soft-grip throttle handle fits comfortably in your hand to reduce fatigue. To prevent accidental throttle engagement, the interlock must be engaged before the trigger can be activated. The Start-Stop switch eliminates accidental shutoff.

SIMPLICITY.
The positive-lock coupler simplifies attachment changeouts so you can move on to the next job quickly and easily.
